CUBES

An Easy Way to Manage Your Subscriptions

Try Out Cubes

Cubes is a comprehensive tool that takes the headache out of managing your software licenses. A user-friendly interface makes it easy to input all of your data, while visual reports and dashboards allow you to quickly see where your licenses stand.

Expiration Alerts

Receive an alert 30, 60, or 90 days before a license expires. Never worry about needing to check on every expiration date again.

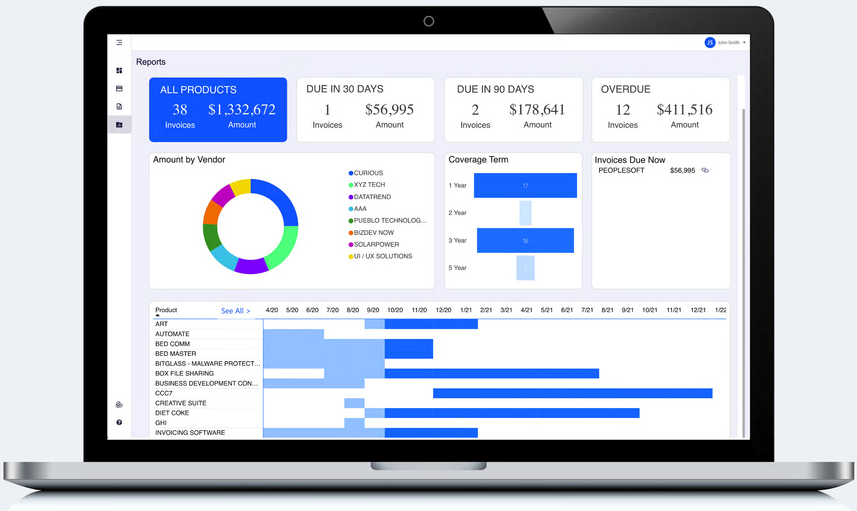
Automation

Quickly and easily upload your license information from a spreadsheet and start keeping track of your licenses.

Visual Dashboard

Get a snapshot of where your licenses stand – from licenses that need to go out to bid to the amount due within 30 days.

Companies spend a fortune on software licenses every year, and a lack of organization or management around them can result in unintended automatic renewals, penalties, or unnecessary usage costs. When you've got an organization to manage, KPIs to meet, and customers to serve, keeping track of software licenses on a spreadsheet just won't cut it (and it's probably the last thing on your mind).



Manage Licenses From Any Vendor

Office 365 · Dropbox · G Suite · Bitdefender · Microsoft Azure

AvePoint · Cirius · ServicePoint 365 · Webroot an opentext company · Global Knowledge · Commvault

Microsoft Surface · SIOS · Microsoft Dynamics 365 · Synnex Corporation · Teamfusion
